

2511 siabite

the performance specialist for powerfile sanders

the performance specialist for powerfile sanders
 2511 siabite abrasive belts are designed especially for powerfile sanders and provide maximum efficiency on high-alloy steel and other hard to grind metals thanks to the self-sharpening effect of the ceramic grit.

- ▶ Less machine interruptions thanks to long lifetime
- ▶ Minimal effort required thanks to highly aggressive abrasive grit
- ▶ Heat-reduced cutting thanks to active additive with cooling effect
- ▶ More efficiency thanks to the highest performance
- ▶ Improved flexibility for power files thanks to special flexing

Product profile

Grit type:	Ceramic aluminium oxide
Grit range:	36-120
Backing:	y-wt cloth
Coating:	Closed
bonding:	Resin over resin
Special coating:	Cooling additive

Applications

- Weld preparation
- Sanding down
- Deburring
- Smoothing and blending of flaws
- Removing discolouration
- Surface treatment
- Structuring and final sanding

Use

Materials

High-alloy steels

Technology

siafast
