Yes

Certification
UL

- Wireless RF control for an easy, no wire installation
- Great for DIY installations
- Up to 4 zones per switch with easy push button pairing to the wireless dimming receivers
- Unlimited receiver locations per zone
- Multiple switches per zone for easy 2, 3, or 4 way control
- Can be ganged with standard switches or outlets saving space, simplifying electrical layout and drastically reducing labor and material costs
- Up to 100' of wireless range, even through obstacles like walls
- Detachable face for easy handheld remote operation and battery replacement
- Low cost, long life lithium 3V battery for up to 10 years of operation

SA40586

4 Zone Wireless Wall Controller - Building a smart home is easier than ever before. With two innovative, simple to use products, you can have full control of all your lighting in no time at all. Now you can control your lights with more than one controller in separate areas and as though they were connected! Have you ever wanted to control lights in two or more areas without the need to pull or run wires? This wireless system does exactly that! It lets you individually control different zones independently or in a group. This wireless system uses a strong RF signal that is able to travel through trees, buildings or glass, and can be used up to 100 feet away. Controlling your lights has never been so easy! This battery powered, wireless wall unit will control four zones by simply pairing it to a dimming receiver. This unit can also be detached from the wall plate and used as a mini remote.
