

CRIMPED WIRE

Internal Brushes

Internal brushes are available in several filament styles, allowing you to choose the right brush for your application. These brushes are ideal for reaching into holes and crevices where other brushes cannot.

HELITUF™ CRIMPED WIRE INTERNAL BRUSH

Heavily filled, rugged brushing tools suitable for use by hand or in power tools. Helituf brushes should be used only with suitable holders and fully chucked.

► **APPLICATIONS:** Cleaning the entire inside circumference of a hole, cleaning out threaded areas, brushing edges of keyways and other recesses
