

# Style SSB-7

Y-Strainer Stainless Steel (ASTM A 351, Grade CF8M) 600 lb. Threaded 600 lb. Socket Weld

## **Cast 316 Stainless Steel Y-Strainer**

### **APPLICATIONS**

Steam, water, oil or gas where protection from foreign matter in a pipeline is required.

### CONSTRUCTION

The Keckley Style SSB-7 stainers are constructed from rugged 316 stainless steel castings that are machined to exacting specifications.

Socket Weld bore is in compliance with ASME B16.11 unless otherwise specified.

### **FEATURES**

The Keckley Style SSB-7 strainer features a machined groove in the body and cap for proper alignment and to ensure accurate reseating when servicing is required. This strainer has a straight threaded cap and is furnished standard with a NPT blow-off connection. The gasket is 304 stainless steel spiral wound and is compressed between the body and cap (for maximum strength and durability) and designed for both high pressure and high temperature service. Keckley Style SSB-7 strainers can be supplied with a stainless steel blow-off plug upon request.

### **SCREENS**

Standard perforated 304 stainless steel screens are spot welded along the seam for maximum strength. Different size perforations and meshes are available in stainless steel, monel, and brass to meet specific media requirements. If media is not indicated, screens for *steam* will be supplied.

### **SELF CLEANING**

Self cleaning is accomplished by opening the valve or drain plug connected to the blow-off port. **Warning:** See Maintenance Instructions on page S6 of the Strainer Information Section for additional precautions and detailed information on servicing the strainer.

### **WORKING PRESSURES - NON SHOCK**

NOM. RATING	MEDIA	1/4" to 3"	8 mm to 80 mm		
600# (THREADED & SOCKET WELD)	STEAM	600 PSI @ 1125°F	4138 KPa @ 607°C		
	W.O.G.	1440 PSI @ 100°F	9932 KPa @ 38°C
