Stainless Steel Single Bowl Kitchen Sink S2225/80ML/#E

22" D x 25-1/4" W (559mm x 641mm), 8" (203mm) deep bowl OD

Estate sinks are fabricated from thick 18 gauge 18/10 stainless steel, making them extra strong and virtually corrosion free. They are guaranteed on materials and workmanship for life. Roomier bowls accommodate your largest pans or utensils. A pre-installed rim seal eliminates caulking, sealing your sink to the countertop. A durable, attractive lustre bowl finish is accented with a mirror deck. The recessed spillway partition channels overflowing water from one bowl to the other. Sound deadening pads on the underside of bowls eliminate excess noise and vibration. Undercoating further deadens sounds, provides an added barrier to water condensation, and offers better heat retention. Hold-down clamps attach to the bowl before going into the countertop for a secure, trouble-free installation.

Each sink comes with illustrated installation instructions, a machined masonite countertop cutout template and a use and care guide. *Strainer 1135 sold separately.* S2225/80ML/3E has three 1-1/2" diameter holes. S2225/80ML/4E has four 1-1/2" diameter holes, 4" center-to-center. A 27" cabinet is the recommended minimum.
