SA9012

SLS LED Recess/Surface Light - This discreet SLS LED fixture has 6 high output LED diodes and can be surface mounted with included ring, or flush mounted. Thanks to the unique manufacturing process of the SLS range, they produce an even glow without individual LED's being visible. The convenient design allows this fixture to tuck out of the way or be mounted on almost any flat surface. The substantial thermoplastic construction assures years of enjoyment. The long life span of 50,000 hours provides years of maintenance-free lighting. Extremely low power usage allows for many hours of guilt-free task or display lighting, and does so without generating excessive heat. The SA9012 can be used with Sensio's dimmable driver which enables you to dim the puck lights using standard wall dimmer switches. This puck can also be used with standard drivers and the Sensio 4-zone wireless controller system to achieve dimming. Available in cool white or warm white light with an aluminum finish.
