

grease interceptor

Specification and Submittal

SUBMITTAL

Standard

Location: indoor

Installation: above/below grade

Flow Rates / Grease Capacities: 50 GPM (3.2 L/s) / 272.7 grease lbs. (123.7 kg) 75 GPM (4.7 L/s) / 175.6 grease lbs. (79.7 kg)

Solids Capacity: 1.9 gal. (7.2 L) Liquid Capacity: 40 gal. (151.4 L) Weight: 69 lbs. (31.3 kg) Connections: 3" (75 mm) and 4" (100 mm) plain end

Cover: bolted gas/water tight polypropylene with 450 lb. load rating, or 1,000 lb. when unit is buried with FCR1 riser

Options

-FO: fixed outlet diffuser
FCR1 (x1): > 2-1/8" - 12" field cut riser
FCR1 (x2): > 12" - 25" field cut risers
CC1: membrane clamping collar kit
(requires FCR1 riser)
PP1: pumpout port kit
F32: 3" x 2" (75 x 50 mm) FPT fittings (x2)

SPECIAL PRECAUTIONS

For All Schier Grease Interceptor Installations - Failure to follow this guidance voids your warranty

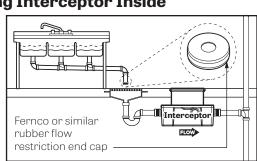

Installation Instructions

Installation instructions and additional components are included with the interceptor. Read all instructions prior to installation. This interceptor is intended to be installed by a licensed plumber in conformance with all local codes.

When Installing Interceptor Inside

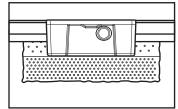

If your dishwashing sink(s) discharges into a floor drain/ sink (drain), you must regulate the flow into the drain to avoid an overflow of water onto the kitchen floor. This can be done by installing a valve or flow restriction cap

on the sink piping that discharges into the drain. See drawing above for guidance. For detailed guidance on indirect connections, go to: http://webtools.schierproducts.com/Technical_Data/Indirect_Connections.pdf

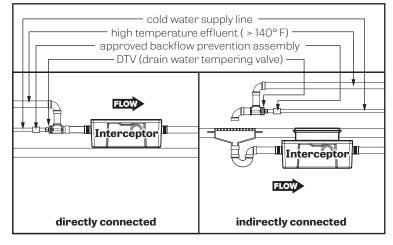

Flush-to-Grade Burials

Flush-to-Grade buried installations (without a riser) are not recommended for heavy foot traffic areas without the use of an internal support system (sold additionally).

High Temperature Kitchen Water

If water is entering the interceptor at excessive temperature (over 140° F), a drain water tempering valve (DTV) and approved backflow prevention assembly must be installed. Most state and local plumbing codes prohibit water above 140° F being discharged into the sanitary sewer. Water above 140° F will weaken or deform PVC Schedule 40 pipe, poly drainage fixtures like interceptors and erode the coating of cast iron (leading to eventual failure).

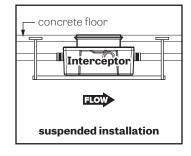

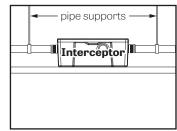

Fully Support Base of Unit

Install unit on solid, level surface in contact with the entire footprint of unit base; for suspended installations design trapeze to support the wet weight of the unit. Do not partially support unit or suspend unit using metal U-channel to create a trapeze

Support Inlet and Outlet Piping

For above grade installations ensure heavy inlet and outlet piping (such as cast iron or long runs) is properly supported or suspended during the entire installation process to prevent connection failure or damage to bulkhead fittings.

SPECIFICATION

Notes

- 1. 4" FPT inlet/outlet with 3" and 4" plain end fittings.
- 4 FPT met/outlet with S and 4 plan end millings
 Unit weight 69 lbs. (wet weight 404 lbs.)
- Gapacities Liquid: 40 gal.
 @50 GPM- Grease: 272 lbs. (37.2 gal.)
 @75 GPM- Grease: 175 lbs. (17.4 gal.)
- Solids: 1.9 gal.
- **4.** Built-in flow control.
- **5.** For gravity drainage applications only.
- Do not use for pressure applications.
 Cover placement allows full access to tank for proper maintenance.
- 8. Vent not required unless per local code.
- **9.** Engineered inlet and outlet diffusers are removable to inspect/clean piping.
- **10.**Integral air relief / anti-siphon.

Engineer Specification Guide

Schier Great Basin[™] grease interceptor model #GB3 shall be lifetime guaranteed and made in USA of seamless, rotationally-molded polyethylene. Interceptor shall be furnished for above or below grade installation. Interceptor shall be certified to ASME A112.14.3 (type C) and CSA B481.1, with field cut riser system, built-in flow control, built-in test caps and three outlet options. Interceptor flow rate shall be 50 or 75 GPM. Interceptor grease capacity shall be 272 lbs. @ 50 GPM or 175 lbs. @ 75 GPM. Cover shall provide water/gas-tight seal and have minimum 450 lbs. load capacity.

Certified Performance

Great Basin[™] hydromechanical grease interceptors are third party performance-tested and listed by IAPMO to ASME #A112.14.3 and CSA B481.1 grease interceptor standards and greatly exceed requirements for grease separation and storage. They are compliant to the Uniform Plumbing Code, the National Standard Plumbing Code, the National Plumbing Code of Canada, and the International Plumbing Code.
