

- Complies with American National Standard Z358.1
- Galvanized Steel Pipe Protected with BradTect® Safety Yellow Coating
- Universal Identification Sign and Inspection Tag Included
- · Wall Bracket Included
- Full, One-Year Warranty
- Classified by Underwriters Laboratory Inc. to ANSI Z358.1

Specifications

Unit design saves space and fits easily into any work environment. Eye/face wash operates quickly by a large, highly visible push handle. Safe, steady water flow under varying water supply conditions from 30–90 PSI is assured by integral flow control in the sprayhead assembly. NOTE: The ANSI Z358.1 standard requires an uninterruptible supply of flushing fluid at a minimum 30 PSI flowing pressure. Eye/face wash sprayheads contain an antimicrobial agent to protect the sprayheads.

This plumbing fixture is not intended to dispense water for human consumption through drinking or for preparation of food or beverages.

Standard Equipment

Eyewash Bowl

103/4" (273mm) diameter corrosion-resistant stainless steel.

Standard Sprayhead Assembly

Twin ABS plastic perforated-disc eye/wash sprayheads with protective sprayhead covers. Safe, steady water flow under varying water supply conditions from 30–90 PSI is assured by integral flow control in the sprayhead assembly.

Valve

Chrome-plated brass ½" NPT stay-open ball valve. Hand operated by a large, highly visible safety yellow PVC push handle.

Pipe and Fittings

Galvanized steel protected with BradTect® safety yellow coating.

Wall Bracket

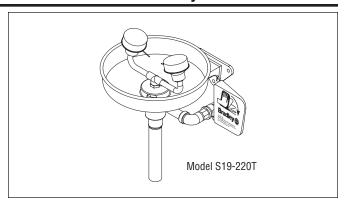

Heavy-gauge sand cast aluminum protected with BradTect® safety yellow coating. Includes three clearance holes for mounting bracket onto wall (mounting hardware not included).

Waste

11/4" drain fitting and tailpiece furnished.

Water Supply

1/3" NPT.

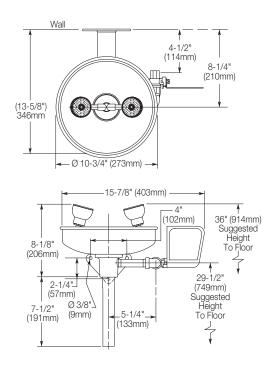

Model	Description
□ S19-220	T Wall-Mount Eye/Face Wash Unit - Stainless Steel Bowl
□ S19-200	Navigator EFX8 – Emergency Thermostatic Mixing Valve

All dimensions assume standard thread engagement. Variations in manufacturing allow for +/- 1/8" (3mm) per threaded joint. To find the tolerance of a dimension, add the number of thread joints in between a dimension and multiply it by 1/8" (3mm).
